

Hershey Technologies Automated File Import Service for Kofax Capture

Hershey's Kofax File Import Service (KFIS) for Kofax Capture accelerates business processes by collecting existing electronic documents and forms transforming them into accurate, retrievable information, and delivering it all into your business applications and databases.

Designed to accelerate document-based communications workflows by automating the import of incoming or existing electronic content. Hershey's KFIS operates as a Windows service eliminating time consuming and costly manual file import selections. Hershey's KFIS improves decision support and investment return by efficiently processing electronic content created by FAX servers, multi-function peripherals (MFP), digital copiers and other systems into a Kofax Capture document transformation process, eliminating costly printing and document handling, and scanning services.

Kofax File Import Service Key Features

- Automates manual and error prone files selection processes.
- Operates unattended as a Windows Service.
- Leverages Kofax Application Program Interface Model to ensure accurate system to system communication.
- Configurable "*point and click*" system administration setup.
- Supports multiple watch folders, each with its own settings and options.
- Subfolders in watch folders where files can be imported as new batches or documents in the same batch.
- Ability to automatically assign batch and document level metadata.
- Allows backup and retention of source files.

Requirements:

- Certified with Kofax Capture version 7.5 thru 10
- Kofax Capture Scan or Workstation License
