

Kofax Capture to Cimage Fusion Connect Agent

Hershey Technologies Kofax *Capture* release script for *SWORD's Cimage Software*, offers a highly automated means to capture paper, FAX, email and electronic scanned images directly into the Cimage Fusion content management repository. Hershey Technologies Kofax - Cimage release script provides an easy-to-use interface to automate information capture, thereby improving organizational efficiency and compliance.

Kofax Capture is the leading content / information capture solution providing automated document classification, separation and data extraction from document based information sources. Cimage clients will realize dramatic improvements in user productivity and corresponding reduction of organizational costs with Kofax Capture.

Hershey Technologies (www.hersheytech.com) release interface provides an easy-to-use interface for linking Kofax Capture Ascent Values to Cimage Fusion document properties and folder properties. Examples of Kofax Capture Values include: Document index fields, Folder index fields, Batch fields, Kofax Capture Values, and Text Constants.

Distributed Document Capture Support. Hershey has designed the Cimage Release to support a unique document ID feature and take full advantage of the Kofax Capture remote and distributed document capture support options from FAX, digital copiers and over 100 models of document scanners.

Robust Workflow Support.

The Kofax Capture Release Script Information Interchange feature is useful when more than one release script has been configured for a particular workflow or batch class and document class combination. The sharing of information is accomplished by allowing the release scripts to pass information to other release scripts.

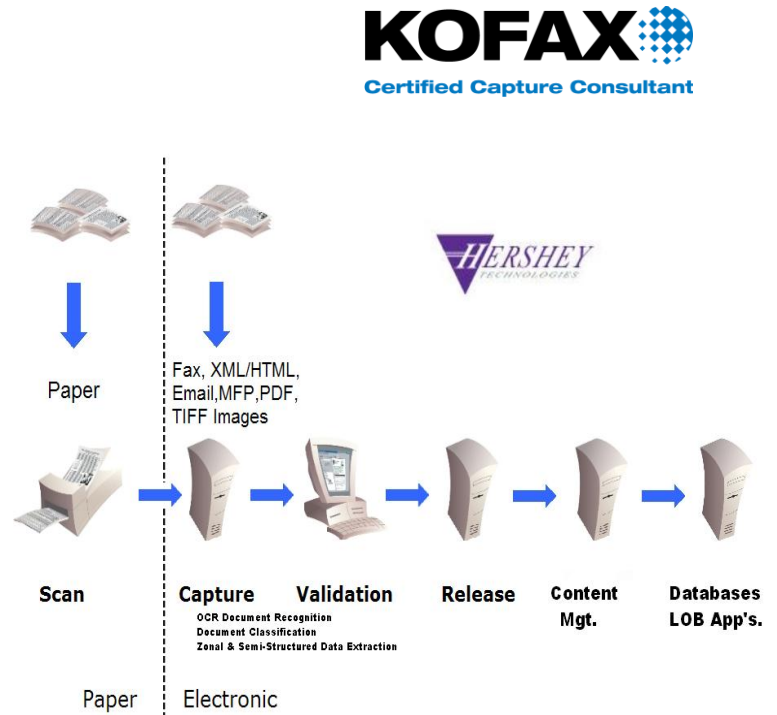

Hershey's Kofax Capture 7.5/8.0 Release Script for Cimage Fusion provides an easy-to-use setup dialog box available from the Kofax Capture Administration module. This dialog box allows you to specify release settings at batch class setup time that control how and when documents are released into your Cimage Fusion repository.

Requirements:

Kofax Capture v7 or v8

Cimage Fusion v 3.0 and above ¹

DIGITAL DOCUMENT CAPTURE WORKFLOW

Industry Standard Digital Image Support Options

With the Kofax Capture Release Script for Cimage Fusion, you can release Kofax generated Tiff or PDF documents into your Cimage Fusion repository. Kofax PDF is bundled with Kofax Capture and does not require additional software implementation. Kofax PDF documents can be saved in the following output types:

- Single / Multipage PDF Image Only
- PDF/A Image Support
- PDF I Image + Text searchable files.

For Cimage full text query of imaged documents Kofax optional *PDF+Text* modules will need to be procured by the client.
